

This Morning:

Chapter 1

Identifying and Networking with
Local Agencies and Citizens

Chapter 2

Getting to Know Your Watershed

Chapter 3

Defining the Critical Area

Chapter 4

Surveying the Watershed to
Inventory the Critical Area

Chapter 5

Prioritizing Pollutants, Sources and
Causes

Chapter 6

Determining Objectives for Your
Watershed Goals

This Afternoon:

Chapter 7

Identifying Systems of Best
Management Practices Needed

Chapter 8

Identifying and Analyzing Existing
Local Projects, Programs, and Ordinances
in Your Watershed

Chapter 9

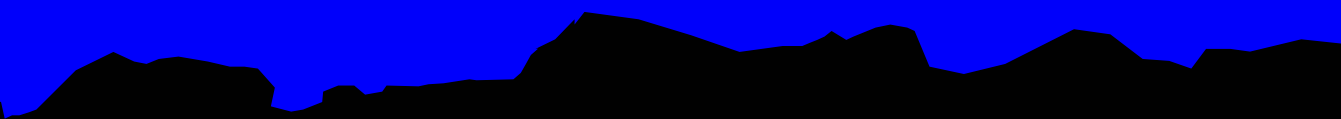

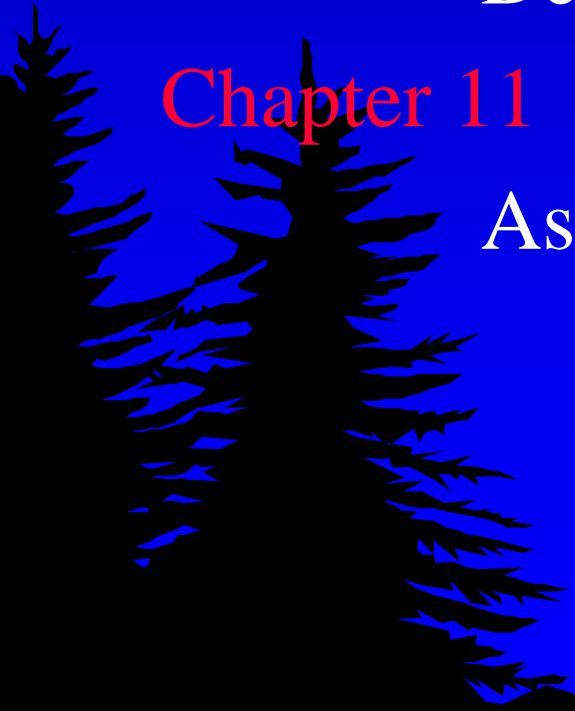

Informing and Involving the Public

Chapter 10

Developing an Evaluation Process

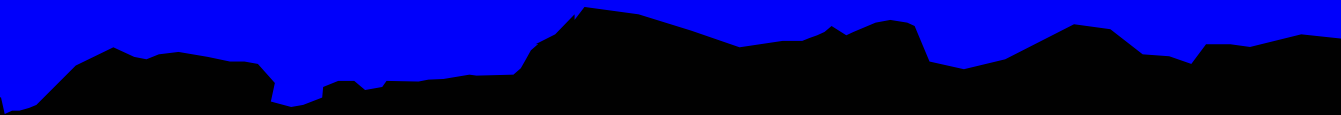

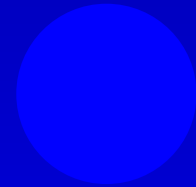

Chapter 11

Assembling Your Watershed Plan

Chapter 7

How Are Appropriate
BMP's Identified?

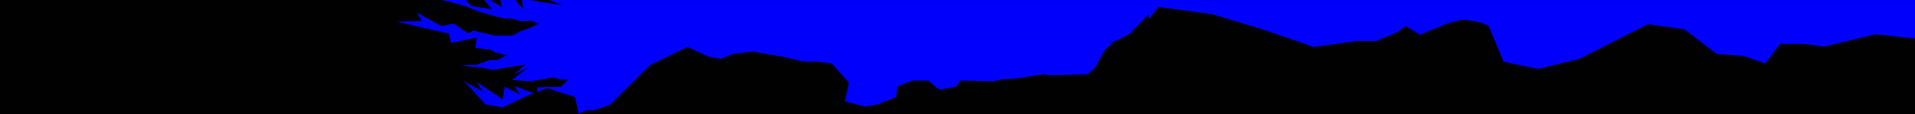

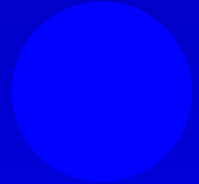

Objectives

Identify BMP's for each source or cause of pollution in the watershed

Combine BMP's into Systems

What Is A BMP?

Best Management Practices (BMP) are measures and actions that interrupt the detachment, transport and delivery of pollutants. BMPs prevent or reduce pollution from nonpoint sources.

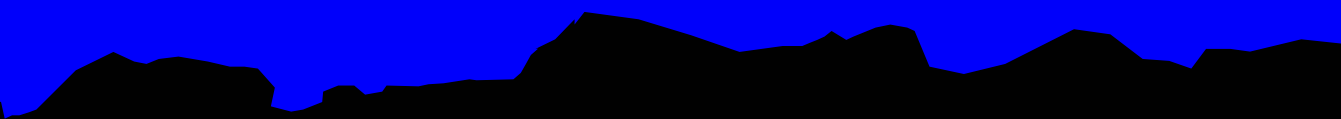

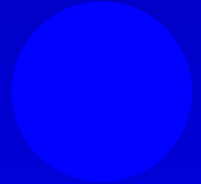

Three Types of BMP's

Structural

Vegetative

Managerial
